

# Golf Genius Live Scoring

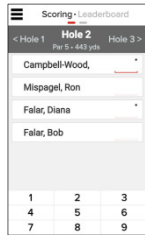

**Live Scoring** is now available during all Coronado Women’s Golf Club events. To participate in live scoring you will need to download the Golf Genius app from your iStore or Play Store.

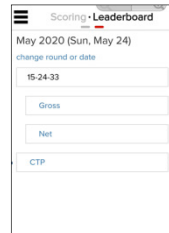

When the GG App is opened, it will ask for a login **GGID**. This **GGID** is a “pairing GGID” and is different for each group of players. Do NOT use your email account. Only the GGID login will work for scoring. At this time, the Pairing GGID will be supplied on the Tee Sheet provided for the event.

Once logged in using your Pairing GGID, you will select your name to get started.

This will present you with your pairing and you are ready to start entering scores.

You may switch to the leaderboard and see how your team is doing compared to those who have already been scored. Leaderboard is updated every 10 seconds. To view the leaderboard better, rotate your phone. Remember - these scores may be partial and are subject to verification.

**REMEMBER** – Scores entered with Live Scoring may be partial scores and all scores are subject to review and correction. The ability to enter scores will only be open during the time the players are on the golf course. After that time, the tournament chair(s) will compare and verify with the “official card” that must be turned in either electronically or physically. The “official card” will override any score entered with Live Scoring.

We hope this will speed up the scoring and make it easier, more fun and safer for all.

Thanks for participating in LIVE SCORING.
